| CANDIDATE NAME | | | |
|-------------------|---------------------------------------|---------------------------------|---------------|
| CENTRE NUMBER | | CANDIDATE NUMBER | |
| CHEMISTRY | | | 9701/32 |
| Paper 3 Advance | ced Practical Skills 2 | | May/June 2020 |
| | | | 2 hours |
| You must answ | er on the question paper. | | |
| You will need: | The materials and apparatus listed in | n the confidential instructions | |
| INSTRUCTION | | | |

- Answer all questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do not write on any bar codes.
- You may use a calculator.
- You should show all your working, use appropriate units and use an appropriate number of significant figures.
- Give details of the practical session and laboratory, where appropriate, in the boxes provided.

INFORMATION

- The total mark for this paper is 40.
- The number of marks for each question or part question is shown in brackets [].
- The Periodic Table is printed in the question paper.
- Notes for use in qualitative analysis are provided in the question paper.

Quantitative Analysis

Read through the whole method before starting any practical work. Where appropriate, prepare a table for your results in the space provided.

Show your working and appropriate significant figures in the final answer to **each** step of your calculations.

In this experiment you will determine the formula of the ion, IO_x^- . To do this you will first react IO_x^- ions with an excess of iodide ions, I^- , to form iodine, I_2 .

The equation for this reaction is:

$$IO_{x}^{-} + yI^{-} + zH^{+} \rightarrow \left(\frac{1+y}{2}\right)I_{2} + \frac{z}{2}H_{2}O$$

where x, y and z are all integers.

The amount of iodine produced will then be determined by titration with thiosulfate ions, $S_2O_3^{2-}$.

$$\rm I_2$$
 + $\rm 2S_2O_3^{2-} \rightarrow 2I^-$ + $\rm S_4O_6^{2-}$

FB 1 is a solution containing 0.0150 mol dm $^{\!-3}$ $IO_{_{\!x}}^{\,-}$ ions.

FB 2 is dilute sulfuric acid, H₂SO₄.

FB 3 is 0.500 mol dm⁻³ potassium iodide, KI.

FB 4 is $0.100\,\mathrm{mol\,dm^{-3}}$ sodium thiosulfate, $\mathrm{Na_2S_2O_3}$. starch indicator

(a) Method

- Pipette 25.0 cm³ of FB 1 into a conical flask.
- Use the measuring cylinder to add 25 cm³ of **FB 2** to the conical flask.
- Use the measuring cylinder to add 10 cm³ of **FB 3** to the conical flask. The solution will turn brown as iodine is produced.
- Fill the burette with **FB 4**.
- Add FB 4 from the burette until the solution in the conical flask turns yellow.
- Add 10–15 drops of starch indicator to the conical flask. The solution will turn blue-black.
- Continue to add more **FB 4** from the burette until the blue-black colour just disappears. This is the end-point of the titration.
- Carry out a rough titration and record your burette readings in the space below.

The rough titre is cm³.

- Carry out as many accurate titrations as you think necessary to obtain consistent results.
- Make sure that your recorded results show the precision of your practical work.
- Record in a suitable form in the space below all of your burette readings and the volume of FB 4 added in each accurate titration.

Keep FB 3 and FB 4 for use in Question 3.

| I | |
|-----|--|
| II | |
| III | |
| IV | |
| V | |
| VI | |
| VII | |

[7]

(b) From your accurate titration results, obtain a value for the volume of **FB 4** to be used in your calculations. Show clearly how you obtained this value.

25.0 cm³ of **FB 1** required cm³ of **FB 4**. [1]

(c) Calculations

- (i) Give your answers to (c)(ii), (c)(iii) and (c)(iv) to the appropriate number of significant figures. [1]
- (ii) Use your answer to (b) and the relevant equation on page 2 to calculate the number of moles of iodine that form when 25.0 cm³ of FB 1 react with 10 cm³ of FB 3.

moles of I_2 = mol [1]

| (iii) | Calculate the number of moles of ${\rm IO_{x}^{-}}$ ions in 25.0 cm ³ of FB 1 . |
|---------|--|
| | |
| | moles of IO_x^- ions = mol [1] |
| (iv) | Use the ratio of your answers to (c)(ii) and (c)(iii) along with the relevant equation given on page 2 to calculate the value of y. (Note that y is an odd integer such as 1, 3, 5, 7 etc.) Show your working. |
| | y = [2] |
| (v) | Use your value of y to determine the formula of the IO_{x}^{-} ion. |
| | formula = [1] |
| (d) (i) | The maximum error in the volume dispensed by the pipette is ±0.06 cm ³ . |
| | Calculate the maximum percentage error in the volume of FB 1 used. |
| | |
| | maximum percentage error = [1] |
| (ii) | A student suggested that a more accurate value of x could be obtained if a 10cm^3 pipette is used to measure FB 3 rather than the measuring cylinder. |
| | State whether you agree with the student. Explain your answer. |
| | |
| | |
| | [1] |
| | [Total: 16] |
| | |

| 2 | In this | experiment | t you | will | determine | the | enthalpy | change | of | solution, | $\Delta H_{\rm sol}$, | for | hydrated |
|---|---------|--------------|-------------------|---------------------|-------------------------|--------|-----------|------------|-----|-----------|------------------------|-----|----------|
| | sodium | thiosulfate, | Na ₂ S | $_{2}O_{3} \cdot 5$ | SH ₂ O. To d | o this | you will | measure | the | tempera | ture ch | ang | e when a |
| | known | mass of hyd | rated | sodi | um thiosulfa | ate is | dissolved | d in a kno | wn | volume of | f water. | | |

FB 5 is hydrated sodium thiosulfate, Na₂S₂O₃•5H₂O.

- Support the cup in the 250 cm³ beaker.
- Use the 25 cm³ measuring cylinder to transfer 20.0 cm³ of distilled water into the cup.
- Weigh the stoppered container of FB 5 and record the mass.
- Measure and record the initial temperature of the water in the cup.
- Add all the **FB 5** to the water in the cup.
- Stir the mixture and record the minimum temperature that is reached.
- Reweigh the stoppered container. Record the mass.
- Calculate and record the mass of **FB 5** added to the water and the change in temperature.

| I | |
|-----|--|
| II | |
| III | |
| IV | |
| [4] | |

(b) Calculations

| (i) | Calculate the energy change of the reaction. |
|-----|--|
| | (Assume that 4.2J of heat energy changes the temperature of 1.0 cm ³ of solution by |
| | 1.0°C.) |
| | Show your working. |

| energy change = | | J [' | 1] |
|-----------------|--|------|----|
|-----------------|--|------|----|

(ii) Calculate the enthalpy change of solution, ΔH_{sol} , for hydrated sodium thiosulfate.

 $\Delta H_{\rm sol} \mbox{ for Na}_2 \mbox{S}_2 \mbox{O}_3 \mbox{$^{\bullet}$} \mbox{5H}_2 \mbox{O} = \mbox{ kJ mol}^{-1} \mbox{ sign} \mbox{ value} \mbox{ [2]}$

| (iii) | Assume that under the same conditions, the enthalpy change of solution, $\Delta H_{\rm sol}$, for anhydrous sodium thiosulfate, Na ₂ S ₂ O ₃ , is $-7.7\rm kJmol^{-1}$. Construct a Hess's cycle and determine the enthalpy change for the following reaction. (If you were unable to calculate an answer to (b)(ii) , assume a value of $+32.2\rm kJmol^{-1}$. Note this is not the correct value.) |
|-------|---|
| | |

$$Na_{2}S_{2}O_{3}(s) \ + \ 5H_{2}O(I) \ \rightarrow \ Na_{2}S_{2}O_{3}{\mbox{\tiny $^{\bullet}$}} 5H_{2}O(s)$$

| $\Delta H =$ | | | kJ mol-1 |
|--------------|------|-------|----------|
| | sign | value | [2] |

| (c) | How would your temperature change in (a) be affected if your sample of FB 5 contained a small amount of anhydrous sodium thiosulfate? Explain your answer. |
|-----|--|
| | |
| | |
| | [1 |

[Total: 10]

Qualitative Analysis

Where reagents are selected for use in a test, the **name** or **correct formula** of the element or compound must be given.

At each stage of any test you are to record details of the following:

- colour changes seen
- the formation of any precipitate and its solubility in an excess of the reagent added
- the formation of any gas and its identification by a suitable test.

You should indicate clearly at what stage in a test a change occurs.

If any solution is warmed, a **boiling tube** must be used.

Rinse and reuse test-tubes and boiling tubes where possible.

No additional tests for ions present should be attempted.

- **3 (a) FB 6** is an aqueous solution containing one cation and one anion, both of which are listed in the Qualitative Analysis Notes.
 - (i) Carry out tests to identify the cation in **FB 6**. Record your tests and observations in the space below.

[2]

(ii) Carry out the following tests and record your observations.

| test | observations | | | | | |
|--|--------------|--|--|--|--|--|
| Test 1 To a 2cm depth of FB 6 in a test-tube, add a few drops of nitric acid, followed by a few drops of aqueous silver nitrate. | | | | | | |
| Pour approximately half the contents of the test-tube into a clean test-tube. | | | | | | |
| Test 2 To one of the test-tubes add aqueous ammonia. | | | | | | |
| Test 3 To the other test-tube add FB 4, $Na_2S_2O_3(aq)$. | | | | | | |

| (iii) | Deduce the formula of FB 6 . | |
|-------|-------------------------------------|-----|
| | | [1] |

- (b) FB 7 is acidified aqueous iron(III) chloride, $FeCl_3$.
 - (i) Carry out the following tests and record your observations.

| test | observations |
|---|--------------|
| Test 1 To a 1 cm depth of FB 7 in a test-tube, add a 1 cm depth of FB 3, KI(aq), then | |
| add starch indicator. | |

[1]

[2]

(ii) Carry out the following tests and record your observations.

| test | observations |
|--|--------------|
| Test 1 To a 1 cm depth of FB 7 in a test-tube, add a 1 cm depth of FB 4, Na ₂ S ₂ O ₃ (aq). Leave to stand until there is no further change, then | |
| add aqueous sodium hydroxide. | |

| | | [2 |
|-------|---|------|
| (iii) | Explain your observation in (b)(ii) when aqueous sodium hydroxide is added. | |
| | | |
| | | |
| | | . [2 |
| | | ٠ |

- (c) FB 8 is acidified aqueous iron(II) sulfate, $FeSO_4$.
 - (i) Carry out the following tests and record your observations and conclusions.

| test | observations | conclusions |
|---|--------------|-------------|
| Test 1 To a 1 cm depth of FB 8 in a boiling tube, add a 1 cm depth of hydrogen peroxide, then | | |
| add aqueous sodium hydroxide. | | |

| (ii) | Write an in (c)(i). | ionic | equation | for | the | reaction | that | occurs | on | addition | of | sodium | hydrox | ide |
|------|---------------------|-------|----------|-----|-----|----------|------|--------|----|----------|----|--------|--------|-----|
| | | | | | | | | | | | | | | [1 |
